Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/30/2009 has been entered.

Response to Arguments

Applicant's arguments with respect to the prior art rejections have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21-45, and 48 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent Application Publication Number 2003/0182431 to Sturniolo et al.

Sturniolo teaches a method (as in exemplary claim 21) of connecting a client system to a target network a step of providing software to the client system that will allow the client system to connect to the target network (the client code not connect to the network without having some form of software provided); and a step of connecting the client system to the target network via a

host system controlled by the software provided in the client system (paragraph 48, netmotion is the target network), the step of connecting the client system to the target network comprising: a step of locating the target network through the host system (access points in Fig 5A-D); a step of determining requirements for connecting the client system to the target network; and a step of linking the client system to the target network based on the requirements (paragraph 48); wherein requirements of the host system are not essential for connecting the client system to the target network (paragraph 48).

As to the rest of the pending claims they are rejected according to the embodiment shown with respect to claim 21.
